

# Trapezoids: Properties Discovery Activity

Answer the questions about the figures below:

**Irregular Trapezoid:**

- 1) Measure all four interior angles. Are any of the four angles congruent? \_\_\_\_
- 2) Measure the lengths of the two **non-parallel sides**. Are the two non-parallel sides congruent? \_\_\_\_
- 3) Measure the lengths of the **two parallel sides**. Are the two parallel sides congruent? \_\_\_\_

Draw the two **diagonals**. Measure their lengths, and the angle they form with one another.

- 4) Are the diagonals congruent? \_\_\_\_
- 5) Are the diagonals perpendicular? \_\_\_\_

Expand every segment in the trapezoid. What kind of angles do you notice  $\angle A$  and  $\angle D$ , and  $\angle B$  and  $\angle C$  are?  
\_\_\_\_\_

- 6) What is, therefore, the relationship between the consecutive angles that are on the same side of the trapezoid? \_\_\_\_\_

**Isosceles Trapezoid:**

Draw the two diagonals. Measure their lengths, and the angle they form with one another.

- 7) Are the diagonals congruent? \_\_\_\_\_
- 8) Are the diagonals perpendicular? \_\_\_\_\_
- 9) Measure the two **legs (the non-parallel sides)**. Are they congruent? \_\_\_\_\_
- 10) Measure the lengths of the two **parallel sides**. Are the two parallel sides congruent? \_\_\_\_\_

**Isosceles Trapezoid:**

- 11) Measure the two **acute base angles**. Compare their measures: The two acute base angles of an isosceles trapezoid are \_\_\_\_\_ to each other.
- 12) Measure the two **obtuse base angles**. Compare their measures: The two obtuse base angles of an isosceles trapezoid are \_\_\_\_\_ to each other.
- 13) **Add** the measures of **one acute** and **one obtuse** angle. What do you notice about the **sum**? In an isosceles trapezoid, an obtuse base angle and an acute base angle are always \_\_\_\_\_.

Measure each of the legs, and find their midpoints. Connect the two midpoints to form the midsegment. Then, form a right triangle connecting the two bases, and measure the distance from each base to the midsegment. What do you notice?:

- 14) The measure from each base to the midsegment in a trapezoid is \_\_\_\_\_.

Summarize, in your own words, the properties of trapezoids in general, and those particular to isosceles trapezoids only.

General properties of trapezoids	Properties of isosceles trapezoids
